

ARCHBISHOP HANNA  
TO DEDICATE CHURCH

Dedication of the new St. Maximus church at Daly City will be observed with all the impressive rites of the Catholic church, next Sunday, March 14.

The various parish societies will assemble at the parish hall at 10:30 a. m., to form in a body to meet the Archbishop and assist at the dedication ceremony.

Archbishop Edward J. Hanna will dedicate the church. St. Francis Assembly, fourth degree, Knights of Columbus, and their band of thirty-five pieces, will assist in the dedication.

Archbishop Hanna is a member of the St. Francis Assembly. The arrangements for the attendance of St. Francis Assembly is in charge of Andrew B. Leary, master of the fourth degree, for Northern California. High officers of St. Francis Assembly, headed by Fred G. Pfeifer, Worthy Navigator; Dan J. Williamson, Faithful Captain; James J. Dunwitty, Faithful Pilot, and William M. Regan, John Parker and David Ryan, will assist in the ceremonies.

The St. Francis Assembly officers and members will proceed to Daly City for the ceremonies, which take place at 11 o'clock, in a caravan of automobiles, from the K. of C. building, 150 Golden Gate avenue.

RETAIL GROCERS WILL  
MEET IN DALY CITY

The following letter was received this week by L. Ross, treasurer of the San Mateo County Retail Grocers' Association:

To meet the invasion of the big chain store systems throughout California, and to mobilize the influence of the individual retail grocers, so that no discrimination may be put over on us, and to better the condition of the individual retail grocers generally, this Association was formed. We have now nearly fifty members that are co-operating with our State Association in every way. There are still a number of grocers engaged in business in San Mateo county that should join us and assist.

We will meet next Tuesday night, March 16, at Eagles' Hall, 6276 Mission street, Daly City, at 8 p. m., at which time there will be presented a very attractive program, some interesting speakers and a lot of beneficial discussion by our own members, as well as a delegation of retail grocers from Santa Clara and San Francisco county local associations. This meeting is held in the northern end of the county to attract new members from Daly City, South San Francisco and Colma.

Our state officers will be there with some new facts and figures on information just secured. It will, indeed, be interesting.

Refreshments will be served. Come and bring the ladies. They will enjoy it.

**SAN MATEO COUNTY RETAIL GROCERS' ASSOCIATION.**  
Hugo Bettelheim, President.  
H. E. Morken, Secretary.

Mayor H. H. Smith will welcome the members of the Association. All local grocers are urged to come and bring their wives.

## DROPS DEAD ON GOLF COURSE

John Kellajtes, of Oceanview, dropped dead from heart trouble last Saturday at the San Francisco golf links. Deputy Coroner L. D. Pepper took charge of the body, which was removed to the W. C. Lasswell & Co. undertaking parlors. Funeral services were conducted Tuesday from the chapel of W. C. Lasswell & Co., by Fr. V. Sasinek of Local 33, N. S. N., thence to St. Michael's church, Oceanview, where a requiem high mass was celebrated for the repose of his soul. Interment was in the Holy Cross cemetery. He leaves his wife, two daughters, Mrs. J. T. Doyle and Mrs. J. E. Doyle, both of Daly City, and four sons, Messrs. John, Carl, Chester and Joseph Kellajtes.

## REGISTER NOW

March 13th is the last day to register to vote at the coming city election. You can register with any of the following:

Mrs. Ida Preston, 209 Woodrow street.  
Mrs. May Hawkins, 139 Knowles avenue.  
J. J. Fahey, 6284 Mission street.  
Mrs. Ella McKee, 79 Irvington street.  
Mrs. M. Chesney, 298 Crocker avenue.  
Philip Fahy, 613 Bellevue avenue.  
B. C. Ross, City Clerk, City Hall.  
Judge E. C. Johnson, City Hall.  
The City Hall registration offices will be open from 7 to 9 every evening until registration closes.

## The Smash That Broke the Bottle-neck

(Photo Courtesy San Francisco Bulletin.)

The Colma "bottle-neck" is to be broken. It has been definitely decided to widen the highway.

The State Highway Commission on Monday took steps to acquire property right-of-way deeds as the first step in breaking the "bottle-neck." Five cemeteries south of Colma are to be moved over portions of their lands to make

possible the widening of the roadway south of Colma and through the cemetery section to 124 feet.

Colonel John H. Skeggs, state highway engineer, simultaneously set a staff at work clearing up the final engineering problems, and estimated that the project would be ready to let to contractors within six weeks.

Final plans, involving an expenditure of \$506,500, were signed at a conference of all parties concerned at the City Hall in San Francisco last Saturday. The only matter to be settled in the lengthening of the Southern Pacific span across the highway just south of Colma.

The picture above shows: Left to

right, standing: City Engineer M. M. O'Shaughnessy of San Francisco and John Skeggs, state highway engineer; sitting, Supervisor Richard Welch, Harvey Toy, president of the State Highway Commission, and Samuel Kahn, vice-president of the Market Street Railway Company, signing the agreement to break the "bottle-neck."

POLLING PLACES FOR THE  
COMING CITY ELECTION

At the meeting of the city trustees last Monday evening two petitions were presented. One petition asked for lights to be installed on Hillcrest Drive near Mission street. The other requested lights on Mission Circle.

A complaint was registered against cows on Citrus avenue, claiming them to be a public nuisance. A committee was appointed to investigate the matter.

A resolution was passed giving notice of a general municipal election of Daly City on April 12, when three members of the board of trustees will be elected, and dividing the city into five consolidated election precincts for the coming election. They are as follows:

Consolidated Voting Precinct No. 1, comprising State and County Precincts 1, 2 and 3, polling place Company No. 4 fire house on Peoria street between Evergreen and Crocker avenues.

Consolidated Voting Precinct No. 2, comprising State and County Precincts 4 and 5, polling place A. L. Hilton's home at 162 Crocker avenue.

Consolidated Voting Precinct No. 3, comprising State and County Precincts 6 and 7, polling place Company No. 1 fire house at 194 Santa Barbara avenue.

Consolidated Voting Precinct No. 4, comprising State and County Precincts 8 and 9, polling place 199 Knowles avenue, corner of Miriam street.

Consolidated Voting Precinct No. 5, comprising State and County Precincts 10 and 11, polling place Company No. 3 fire house on West Lake avenue near Mission street.

All polling places will be open on election day from 6 a. m. to 7 p. m.

PIONEER DALY CITY  
WOMAN PASSES ON

Mrs. A. E. Less, of 5681 Mission street, died Tuesday evening at St. Luke's hospital, following a long illness, of cancer of the stomach. The funeral was held from the parlors of H. F. Suhr Co., with interment in Home of Peace cemetery. Mrs. Less, who was 56 years of age, was a pioneer resident of Daly City, locating here in 1906, and her death will be mourned by a host of friends. She leaves two sons, Fred and Charles Less, and a daughter, Mrs. Sadie Hattabough, and a sister, Mrs. George Gordon.

PLAN TO RELIEVE  
TRAFFIC CONGESTION

The street committee made a report to the Daly City board of trustees at their meeting Monday evening of a conference held with the State Highway Commission regarding congestion of traffic on Mission street at the top of the hill. Another conference is to be held some time during next week, at which time the city engineer will have a map covering the situation, and it is expected that some action will be taken in the near future to eliminate this traffic evil.

FORTY NEW HOMES  
WILL BE ERECTED

At the meeting of the city trustees Monday evening permission was given to a San Francisco realty firm to erect a sales office on Mission street near Alp avenue, for the purpose of handling the business of Mohr & Son, who are making preparations to erect forty high class residences on lots they have just purchased in the Vista Grande Tract.

## GRACE PRESBYTERIAN CHURCH

The services last Sunday were splendid throughout the day, and many new faces were seen in the audience in the evening. The music was exceptionally good. One new member was joined to the orchestra and another is promised for next Sunday.

The services next Sunday evening will begin at 7:30 as usual, and will be opened by special music by the orchestra, followed by real congregational singing. The sermon theme will be "The Unspotted Christian, or the Man With the Real Drawing Power."

The girls club met with Mrs. Gatchell Tuesday afternoon and organized by electing the following officers: Evelyn McKee, president; Kathleen Welch, vice-president; Helen Anderson, secretary; Mrs. Gatchell, parliamentarian; and Mrs. Wagoner, treasurer.

## Will Organize DeMolay Chapter

A committee appointed by the Master of Crocker Lodge No. 454, F. & A. M., announces that on Saturday evening, April 3, Crocker Chapter, Order of DeMolay, will be instituted in Daly City. The organization of the DeMolay Chapter in Daly City is another indication of the progress of this community. Further particulars will be announced next week.

NEW RULING ON  
SCHOOL VOTERS

Only those voters who have registered since January 1 are eligible to participate in the election of school trustees in the various California districts on March 26, Will C. Wood, state superintendent of public instruction, has announced upon advice from Attorney General U. S. Webb.

Contrary to past interpretation of the election laws, the attorney general holds that registrations for a given year are not good for elections of school trustees in the following year, and consequently those on the 1925 register can not vote this month unless they have registered.

This, however, does not affect bond or other special school elections held before April 1, according to Webb's advice to school authorities. The old 1925 register holds good for such elections, including the one in Marin county to determine whether a junior college district shall be formed there, Superintendent Wood said.

WOMAN LOSES ARM  
IN AUTO ACCIDENT

When the automobile in which she was riding with her husband overturned on the Skyline boulevard, Mrs. John Sterling, of San Francisco, received injuries which necessitated the amputation of her right arm.

The accident occurred when the car swerved sharply to the right in an attempt of Mr. Sterling to avoid a collision with a machine that stopped suddenly in front of them. When the car turned over, Mrs. Sterling was pinned beneath it. Sterling stopped a passing motorist and took his wife to San Bruno, where she was treated. She was later transferred to the Mills Memorial hospital at San Mateo.

BURLINGAME GIRL  
ATTACKED BY DOG

Attacked by a police dog that threatened to tear her to pieces, the young daughter of Attorney McCree of Burlingame suffered severe injuries before the enraged animal could be beaten off. The dog's teeth were reported to have sunk into her face and neck, and it is said that seventeen stitches were taken to close the wounds.

The attack occurred Saturday afternoon when the girl resisted the attempt of the dog to snatch some papers she had in her hand. Her cries were heard by pedestrians, who rushed to her assistance.

COUNTY TO ASSIST  
IN PAVING PROJECT

At a special meeting of the San Mateo county board of supervisors, held last Friday, the resolution offered by the city manager of San Mateo to permit the city of San Mateo to assume responsibility for the paving work to be done on El Camino Real in San Mateo was adopted by the supervisors. The resolution also empowers San Mateo to do the county work of resurfacing for which the county has set aside an appropriation of \$12,000.

Under the provisions of the resolution the county is to resurface the present 24-foot roadway which runs through San Mateo, and the property owners along the new strip of roadway are to pay for the shoulders, which are to be added to the present 24-foot strip.

County Engineer Kneese has estimated that it will cost the county approximately \$12,000 to resurface the central portion of the highway.

With the resolution adopted by the county supervisors, the city of San Mateo will proceed to handle both jobs.

The district attorney, who was at the meeting, gave it as his opinion that the county had no legal right to endow the city of San Mateo with any authority to do county work, but explained that the county could accept work done by the city.

The supervisors voted to purchase a 50,000 gallon water tank for the county farm to cost \$1,234.50, plus the cost of a concrete foundation, which is estimated at \$250.

One hundred and forty-one applications for licenses for soft drink establishments under the new soft drink ordinance were presented at the Friday meeting of the supervisors. The date for hearing on the applications was set for April 5.

SOUTH CITY PLANS  
WATER PURCHASE

The committee appointed by the South San Francisco board of trustees to report on the matter of the acquisition of the South San Francisco Water Company by the city, has recommended that the proposition be placed on the ballot to be voted on by the people of the city of South San Francisco at the general election on April 12, 1926.

If the majority of the voters favor the purchase of the water system, the board of trustees will then have the city engineer inspect and appraise the physical properties of the water company and ascertain its present condition, and will then negotiate with the water company as to the price, after which the definite proposal to acquire the system by a bond issue or otherwise will be submitted to the people, which proposal will require the two-thirds vote.

YOUNG COLMA MAN  
CALLED BY DEATH

John Bertucci, one of the most prominent residents of Colma, died last Saturday, and funeral services were conducted Tuesday at the Church of the Holy Angels, where a requiem high mass was offered for the repose of his soul. Mr. Bertucci was 24 years old and was the son of Mr. and Mrs. Gerolamo Bertucci, who have made their home in Colma for more than a quarter of a century.

AGED DALY CITY RESIDENT  
REMEMBERED BY FRIENDS

Mrs. N. N. Dexter celebrated her 95th birthday on Monday, March 8, at her home, 47 Vendome avenue. A number of her friends surprised her by dropping in, and Mrs. Dexter was the recipient of many beautiful gifts. A delicious luncheon was served by Mrs. A. M. Giddings, who acted as hostess. In the evening whist was enjoyed by the guests. Mrs. Dexter, when the guests were departing, declared that she had passed one of the most pleasant days of her life.

LUNCHEON IN CELEBRATION  
OF BOTTLENECK BREAKING

The board of directors of the Down Town Association of San Francisco on Tuesday adopted resolutions expressing their satisfaction over the assured breaking of the "bottle-neck" at Colma, and also inviting those mainly responsible for that achievement to be the Down Town Association's honor guests at a luncheon next Thursday, March 18, at the St. Francis Hotel, when Governor Richardson and Mayor Rolph will be among the speakers, with Harvey M. Toy, head of the State Highway Commission, as chairman of the day.

The luncheon is open to the public, and all residents of Daly City and Colma are invited. The price will be \$1 to all except the honor guests.

## Centralization in Government Increases; It Grows by What It Feeds Upon

By GOV. ALBERT C. RITCHIE, of Maryland.

STATE rights is a phrase to which the battle fields of the Civil war attached the label of a lost cause. It involved two things: First, the right of the state to nullify an act of congress which it declared unconstitutional; and, secondly, the right of a state to secede from the Union.

Nullification and secession are now happily disposed of forever. But in other respects the issue of state rights is as fundamental, and a clear apprehension of its meaning and a clear perception of its application to the political questions of today are as vital as ever before in our history. I am not discussing the rights of the states historically or as an academic phase of political science. I am concerned only with their practical bearing upon some of the problems and difficulties and some of the dangers and pitfalls of modern government.

The business of framing laws and administering them through upwards of four million tax-supported public officials is of itself intricate and difficult. How to make public opinion function and how to translate it into effective government in this chaos of official activity is even more difficult. The key is to build up and maintain the political vitality and integrity of the local political unit.

Centralization increases by leaps and bounds. The war helped this. But unfortunately centralization grows by what it feeds upon. Philosophers have long recognized that means which at first serve a necessary purpose may in time become more important than the end itself. This is what happens in the growth of centralization. The objects of government become lost in the mechanics of government. Laws become more important than men. Power more important than liberty. Business more important than human rights.

## Sudden Weather Changes Do Strange Things to the Illinois Hard Roads

By R. R. BENEDICT, Assistant State Highway Engineer.

A hard road will change its position almost momentarily in a sudden change of temperature. Heat from the sun has more to do with damage to roads caused by weather than any other thing. A hot midday sun causes a hard road to rise in the center like a loaf of bread baking in the oven. If a sudden cold shower falls on the concrete it falls, or shrinks, in the middle. That one thing gave us more trouble than anything else. We have since been able to counteract that damage by putting in a crack running down the center of the road.

Heat also causes a road to expand longitudinally. A slab of concrete will slip for miles in a roadbed until the expansion caused by the heat has been let out. A hard road will even climb over a hill. This is taken care of by expansion joints put in at bridges.

Frost causes much damage to oiled roads; the expansion goes upward and causes great breaks in the surface. We have been making experiments for some time, and we hope finally to find a way to meet any changes in temperature.

## One Logical Solution of the Clothes Problem of American Women

By MRS. JOHN B. HENDERSON, Washington Social Leader.

There is one logical solution of the clothes problem. We can't draw our styles from Paris because they are too vulgar, nor from America because we are not esthetically developed. Very well, we must turn to London. The English fashions combine an old-world artistic sense with the refinement that is a necessary part of our good taste.

There is a definite reason why the English fashions are so restrained. The royal family are the English style arbiters, and since they are very conservative the English styles are correspondingly quiet.

The Princess Mary is the model of most English gentlewomen. She is regal in appearance, her clothes are elegant, but they never violate the fundamental standards. She illustrates the truth that it is possible to be well groomed without being vulgar.

The ladies of the foreign embassies here in Washington follow the same high standards. When we go to their homes we do not see the outlandish costumes that our own ladies delight in. If American women will look to such examples as the Princess Mary and the ladies of the embassies they can't go wrong.

## Heirs of Russian Revolution—100,000 Homeless and Deserted Children

By WALTER DURANTY, in New York Times.

Some day when the canons of political practicability have given way to a demand for stark truth there will be written the epic of Moscow's homeless children—highwaymen, murderers and dope fiends almost before their bones have hardened. Now one can only give scant glimpses of their curious lives and obscure deaths. They flow into Moscow faster than the authorities can collect them, these orphans of war, famine and pestilence—dirty, daring and depraved. For the last three years one of their chief strongholds has been the "catacombs," as Moscow calls an acre-wide range of cellars under an enormous unfinished prewar building right in the center of the city. The jungle life of these catacombs demanded such a toll of blood, so many corpses thrown naked upon the outer snow, that the authorities have put a high wooden fence around the entire area and plan next year to raze this whole city block.

## Support to the Deduction That Sleep May Be in Much Part a Bad Habit

By R. H. ULM, in New York Times.

Most of us do not sleep efficiently, and thereby waste on slumber a lot of time which might be salvaged and added to the hours we give to work or play. Moreover, it appears, according to the findings—which are put forth as more persuasive than conclusive by the scientists who arrived at them—that sleep is a "form of intoxication." The doctors at George Washington university found that sixty to seventy-eight hours of continuous wakefulness had no great physical effect upon the nine subjects. Those who were accustomed to sleeping six hours each night awoke fully refreshed in about ten hours. Those who usually slept from eight to nine hours awoke fully normal after ten to eleven hours in bed. This gives support to the deduction that sleep may be in much part a bad habit, as Socrates, Samuel Johnson and Thomas A. Edison have contended.

## SPRING TOGS FOR JUNIORS; NOVEL WOOLENS IN FAVOR

THE horoscope of fashion foretells a joyous and colorful mode for the young girl for spring. Especially will blithesome youth attire itself in novelty woolen coats from beneath which will peep the sprightliest sort of a silken frock. Topped with a gay little flower-covered chapeau of felt or straw, fabric or ribbon, what item more could one wish to delight the eye! Oh, yes, the scarf! What a sin of omission 't would be to forget to add a vivid scarf to Miss Sixteen's spring costume.

It is not at all surprising that the little mademoiselle in the picture chose a plaided coat in preference to any other novelty woolen, for large handsome plaids are an outstanding feature for this spring. She is wear-

ing its looms to check, stripe, plaid, mottle and multicolor every weave which comes within its range, including fine kashas, repps, tweeds, chevrons, camel's-hair suitings, luster twills, flannels, homespun and others too numerous to give recognition in one brief story of fashion.

While the colors are high in the majority of spring woollens, they are artfully blended and soft in effect. Sometimes as many as from two to half a dozen colors are combined. Interest in tapestry designs in novelty wool goods results in an extensive use of this type of fabric for coats, suits and ensembles.

Ombre effects in flannels and bordered flannels in bright or pastel col-

PLAID COAT WITH GAY SCARF

ors make up charmingly in one-piece frocks. Coming in 54-inch width they are economical as it requires a minimum number of yards for a dress. Greens and rose hues are general favorites as well as soft blues.

In the tweeds, particular interest centers in the herringbone weaves, many of which are extremely elaborate, working out fascinating patterns. These appear in pastel and palm beach shade. With such an imposing array of fascinating materials as this season witnesses, stylists are spurred to feature a campaign of unique design which shall measure up to the fabric itself. That is how it comes that the ensemble shown to the right in this picture is fashioned with extraordinary chic and charm. The handsome material of which this long coat and one-piece frock is styled is both-plaided and bordered in tapestry interweavings. It is

ing a phantom red crepe de chine scarf although a bright green one would be just as stylish. Very handsome camel's hair coatings carry out the paramount idea of novelty in that they depart from the general idea of camel's hair materials by featuring plaids, stripes and gay patterns, maintaining the usual soft fuzzy texture yet smartly bespeaking the vogue in their colorings. Included in these are large bold plaids in several colors on a tan or gray background while others show solid tones with odd border effects.

Clever straightline coats made of woolen fabric which is plaided at the top portion developing into a border of colorful tapestry design, boast caplets which are cut from the border section and which extend only across the back.

The popular plaid coat is as apt to be single-breasted as double and it

FROCK AND ENSEMBLE

glories in very imposing pockets at times. Many a plaid coat is collared with fur, dyed moulton and squirrel being favored.

Very swaggy new coats are cut to flare from the shoulders and these vie with straightline silhouettes for supremacy. Often a border of plain cloth outlines the front edges and the bottom, with collars and cuffs carrying the same idea.

Novelty is the word when it comes to the new woolen fabrics, declared by the mode to be among the smartest items for the styling of spring

marvelously colorful, also extremely lightweight, which is a special characteristic of all the new woollens which are being shown.

The dress to the left is of plaided kasha cloth, in colors which recall the mellow tones and tints of an Arabian tent covering. The scarf worn with it is of gay colored crepe, for in the majority of cases a scarf accompanies the dress or suit. Notice the buttons on the skirt. Buttons are a popular trim this spring.

JULIA BOTTOMLEY.  
(©, 1926, Western Newspaper Union.)

(©, 1926, Western Newspaper Union.)

To each man is given a day, and his work for a day; And once and no more he is given to travel this way. And woe if he fly from the task, whatever the odds; For the task is appointed to him on the scroll of the gods. —Edwin Markham.

### POP CORN WAYS

Is there any food more appetizing than fresh, tender, well-popped corn seasoned with butter? It is always welcome at any time. Corn to pop well should increase its bulk twenty times. If a wire popper is used for popping hold it far enough away from the heat to avoid burning. The right degree of heat

should make good corn pop in a minute and a half. Do not throw away the old bachelors (those that won't pop)—they can be put through a grinder or mill and will make a good breakfast cereal served with top milk. Parched sweet corn is delicious ground and served with milk.

Pop corn is used as a garnish for corn soup. Pop corn with milk makes a delightful supper dish. For those who like chocolate the following will be enjoyed: To two cups of sugar, add one-half cup of corn sirup, two squares of chocolate grated and one cup of water. Cook until the sirup hardens in water then pour while hot over four quarts of freshly popped corn; stir well to insure the uniform coating of the kernels.

For sugared corn make a sirup by boiling two cups of sugar and one cup of water until the sirup hardens in cold water; pour this sirup over six quarts of corn and stir until the grains are well coated.

Pop Corn Jack.—This is home-made cracker jack: Take a cupful of molasses, two tablespoonfuls of water, one teaspoonful of vinegar, cook until nearly brittle when tried in water, then add a tablespoonful of butter and a pinch of soda. Stir into four cupfuls of pop corn, adding a handful of shelled peanuts. Stir until all are well covered with the sirup. Puffed rice may be used in place of corn; pour out into a buttered tin to cool, break into squares when cold.

Pop Corn Balls.—Take a pint of molasses, a pint of water, two tablespoonfuls of butter and a teaspoonful of vinegar. Cook till the sirup will harden in cold water, add half teaspoonful of soda dissolved in a teaspoonful of water. Pour over four quarts of popped corn. Stir until the kernels are well covered, then press into balls quickly with buttered hands.

Maple Sugar Pop Corn Balls.—Prepare the sirup using maple sirup or maple sugar just as for pop corn balls; the flavor is especially delightful. Served with maple wax, the children will have a rare treat.

### What to Eat.

This is the time of year when waffles for breakfast, waffles for luncheon and waffles for supper are a welcome food.

Waffles.—Of the dozens of waffle recipes which are all good, this is the best, by far: Sift together one and one-fourth cupfuls of flour, one-fourth teaspoonful of salt, one-half teaspoonful of soda. Separate the whites and yolks of two eggs, beat well, add the egg yolks to one cupful of thick sour milk, stir in the sifted flour and other ingredients, add three tablespoonfuls of melted butter and fold in the stiffly beaten whites. Cook on a hot, well-greased waffle iron.

Imitation Pate de Foie Gras.—Cook in separate saucepans in enough water to cover one calf's tongue and one calf's liver and let stand a day in a refrigerator to become cold and firm. Cut the tongue into small triangular pieces to look like truffles. Put the liver through a meat grinder, using the finest knife; repeat the process. Into a large mixing bowl put the chopped liver and add one-fourth its volume in softened butter, working them together until smooth. Now add to the liver paste one tablespoonful of onion juice, one teaspoonful each of made mustard and Worcestershire sauce, one-fourth of a teaspoonful each of ground cloves, cayenne pepper, one-half of a nutmeg grated, and salt to taste. Butter the glasses and pack the paste as firmly as possible, mixing the bits of calf's tongue with it. Cover with melted butter and set in the ice box. This will keep for weeks.

Ribbon Salad.—Place a slice of pineapple for each service on lettuce. On the pineapple place sections of orange and grapefruit with membrane removed, in alternating colors, with a strip of red apple unpeeled, between. Serve with any desired dressing.

Corn Dishes.—If we are to be loyal Americans we should at this time try to serve as much corn as possible. Make corn bread, corn gems, corn griddle cakes and corn meal mush. A kettle of well-cooked mush served with good rich milk is a dish which is both wholesome and satisfying. Serve with a few bits of shredded salt codfish for an appetizer and feel that you are pleasantly doing your duty by the corn crop that we are asked to help consume.

Picture Diagram of Receiver Which Will Be of Assistance to Novices Who Desire to Construct Voluminous DX Set.

By HERMAN BERNARD  
Associate, Institute of Radio Engineers.

Once upon a time one saw variable condensers that had about 43 plates and were rated at .001 mfd. capacity. Do you remember the days? That value of capacity was extremely popular. But as receiver design improved and a higher ratio of inductance to capacity was thought advisable, such values as .00025 and particularly .00035 mfd. came into favor. Now the .00035 and the .0005 mfd. condensers are the most popular, and as they fall in nicely with schemes of space conservation they well deserve their hour.

But the .001 mfd. tuning condenser still has its use. It is in the antenna circuit. There are several ways of including it, but the one shown in the diagram is as good as any.

## The Aerial Is Tuned.

The condenser is used to tune the aerial circuit. The reason for the abnormal capacity is that it is perfectly normal in the position where it is incorporated. It is in the aerial circuit and the antenna system capacity is across it. To be sure the coil L would seem to be short-circuiting that antenna capacity, but that is not quite the case. The inductances L and L1 are in the antenna-ground system, and the aerial-ground capacity plays its important part in that lead, this joint contribution constituting the reactance of the circuit. A .0005 mfd. condenser might be used instead of .001 mfd., if one were sure of what one's aerial capacity was, but the .001 gives a wider margin of safety.

The object of the large capacity tuning condenser is to insure a sufficient ratio between maximum and minimum capacity, so that the entire broadcast band will be tuned in.

The circuit is inherently simple. Any one familiar with radio can construct it (modifying the grid return if necessary.)

A comfortable panel for this set would be 7 by 14 inches and it would be so laid out that the aerial tuning condenser is at left, the secondary tuning condenser at right, and the three-circuit tuning coil, L1L2L3, in center. Between the three-circuit coil and C1 would be the rheostat, R1. The Jack is placed at the opposite point. The tickler would not require a dial. A small knob would suffice, or a two-inch dial, while four-inch vernier dials should be used on the two condensers.

A baseboard, if used, would be 8 by 13 inches, secured to the panel bottom by wood-screws. The coil L would be placed horizontally, 3 inches behind the end plate of C1, while the 3-circuit coil would be mounted perpendicularly on the panel. A socket shelf 2 1/2 by 13 inches would be just as suitable.

## Coil Data.

L1L2L3 may be a commercial 3-circuit tuning coil, the capacity of C2 depending on the coil used. Most often this would be .0005 mfd. For those desiring to wind their own 3-circuit coil, a 3-inch diameter stator form, 4 inches high, may be employed, the primary L1 consisting of 10 turns. Leave 1/4-inch space, then wind 45 turns for the secondary L2. The tickler is wound on a 2-inch diameter, 2 inches high and consists of 22 turns. The wire is No. 24 double cotton covered. It is often more convenient to use smaller wire on the tickler, say No. 26, for it doesn't matter there, on the resistance score. As a shaft must penetrate the stator and be secured to the rotor, part of the rotor winding will be separated, at least the width of this shaft, and finer wire makes it easier to put on enough turns to get regeneration on the highest receivable wave.

The secondary is to be tuned with .0005 mfd. For .00035 use 55 turns, for .001 use 33.

As for the coil L, that will require some experimenting. My own aerial has a capacity of .00027 and the proper coil, in conjunction with a .001 condenser for C1, happened to be one comprising 31 turns on a 3-inch diameter tuning. No. 24 DCC wire being used. But some antenna systems will require a greater number of turns, some a lesser number. It is a good plan to put on 40 turns, then peel 'em off, as necessity dictates.

The set operates efficiently on any of the popular types of tubes, including dry-cell tubes.

Mount the condenser C1 on the panel, also the condenser C2. Then mount the coil in the center and next put on the rheostat and Jack. Put the baseboard temporarily against the panel bottom and provisionally place the coil L, and the socket. The coil is at left, behind the first con-

denser, the socket at right. The aerial post will be at left rear, the ground post at rear center. A battery cable avoids the necessity of binding posts.

## Wiring Directions.

Connect the "A" battery wiring on the baseboard parts first. Join "A" battery plus to the F plus post of the socket and to the rotary plates of C2. Connect A minus to one side of the rheostat, R1, the other side of R1 to the F minus post of the socket. The —99 type tubes have their filament, grid and plate posts differently positioned from the standard base tubes, so see that you correctly read the post designation on the socket.

After mounting L, connect aerial to one of L's terminals and to the stator of C1, while the rotor of C1 and the remaining terminal of L go to the beginning of the primary L1, the end of which goes to ground.

The end of the secondary goes to the lead that was connected to the rotary plates of C2 (the A plus lead), while the other terminal of L2 goes to one side of the grid condenser, C3. The other terminal of C3 is connected to the grid post of the socket, marked G on the socket. Across the grid condenser, which has mounting or clips for the purpose, is placed the grid leak, normally 2 meg., although the —99 type tube will stand a higher value of resistance, say 5 meg. The plate post of the socket, marked P, goes to one terminal of L3, the other terminal of which is connected to the hooked spring of the Jack.

It will be noted that in the picture diagram and in the text the grid return is designated as A plus, and this is correct for nearly all tubes, although in some few instances the grid return to A minus, will work better.

The correct return is important.

## The Parts Needed.

- 1 Impedance coil, L.
- 1 3-circuit tuning coil, L1L2L3.
- 1 .001 mfd. variable condenser, C1.
- 1 .0005 mfd. variable condenser, C2.
- 1 .00025 mfd. grid condenser, with clips, C3.
- 1 .00025 mfd. fixed condenser, C4.
- 1 Single-circuit Jack.
- 1 20-ohm rheostat, R1.
- 1 5-meg. grid leak, R2.
- 1 —99 socket.
- 1 7 by 4-inch panel.
- 2 4-inch vernier dials.
- 1 2-inch dial or knob.
- 1 5-lead battery cable.

Accessories: One 4 1/2-volt "A" battery, usual "C" battery serving the purpose; 1 —99 type tube; 1 cabinet to match panel and baseboard sizes; 100 feet aerial wire; 50 feet No. 14 insulated lead-in wire; 2 aerial insulators; 1 ground clamp. Note: The use of a —99 tube is presupposed. If other type of tube is used make necessary substitution of equipment.

## A National Referendum on Sunday Broadcasting

Check Your Answers Here

1. Do you use your radio on Sunday? Yes ☐ No ☐
2. Would you like to be able to tune in on a variety of programs any time between 9 a. m. and 10 p. m. Sundays? Yes ☐ No ☐
3. Would you like the programs to be of a strictly religious nature? Yes ☐ No ☐
4. Or would you like good classical music and instructive features mixed in with the religious part of the program? Yes ☐ No ☐
5. Would you object to jazz and popular music and entertainment on Sunday? Yes ☐ No ☐

## Golden State

News of Interest to All

Gas was struck on the Waterman Alexander ranch east of Windsor, Sonoma county which shows indications of oil on the property.

Plans for a new sewer main were adopted by the city council of Marysville. The new main will be 1963 feet long, and will parallel the present one.

Ground has been broken for the annex to St. Joan of Arc church, in Yountville, Napa county, and the work will be rushed to an early completion.

After negotiating for three days, 20 landowners along Oak Run, Shasta county, reached a compromise agreement for the distribution of the water on that stream.

The recent storm has discolored the water in the Russian river so badly that anglers have lost hope of getting any more steelhead fishing before the season closes.

The Newcastle elementary school district, Placer county, has called an election for March 26, to determine if \$20,000 shall be voted to improve the grammar school plant.

The Stockton Musical club, at Stockton, under the direction of Benjamin Edwards, is forming a large community chorus to take part in Music Week, to be held in May.

Under the latest plan of the city council of Marysville, Yuba county, for street paving, that body is rapidly reaching the goal of having no unpaved streets or alleys within the city limits.

Alturas, Modoc county, forest service officials say the total cut of timber on the Modoc National forest for the year 1925 was 10,946,000 board feet, a considerable increase over the preceding year.

Relic of Browns Valley, Yuba county, mining days, the old office building and headquarters apartments, on the Pennsylvania Mine, which has been idle many years, were destroyed by fire recently.

Plans for the erection of another theater in Oroville this year at an estimated cost of \$200,000 are under way. The theater will be constructed by the Golden State Theater Corporation of San Francisco.

Gerber, Tehama county, is facing a house shortage, every available residence being occupied, and real estate operators reporting several families on the waiting list for renting four to six-room houses.

Further proof that California can supply climatic conditions for every taste was given recently when dog teams and sleighs were used to bring voters over the snow for a special election at Truckee, Nevada county.

The Beneca (Solano county) Post of the American Legion has abandoned the idea of remodeling the present building and is at present working on a building program, which it hopes to develop into a new up-to-date building.

Charles Edward Clark, of Jackson, Amador county, who crossed the plains with his parents when but two years of age in 1852, is dead at the age of 76. He retired from his occupation of ranching several years before his death.

Miss Mary B. Vail, 65, former member of the faculties of Mills College and Columbia University, died at Fresno, recently. She had been conducting experiments with raisins for the Sun Maid Raisin growers until stricken ill two months ago.

On petition of more than fifty residents of the east side, the Willows, Glenn county, trustees adopted an ordinance forbidding the establishment of a cemetery within the city limits. The question long had been a source of bitter controversy.

Adobe construction for farm dwellings is being advocated by L. W. Taylor, Kern county farm adviser, in addresses before farm centers. He argues that adobe houses are cooler in summer and warmer in winter, and that with modern construction they make neat dwellings at a cost lower than for frame buildings.

P. V. Berkey a member of the Board of Supervisors, at Colusa, Colusa county, since 1911, is accredited with being the oldest living native son of Colusa county. He was born in the old Colusa House, now known as the Riverside hotel, in 1865. His father was a member of the county Board of Supervisors at that time. Berkey has lived in the county all his life.

Governor Friend W. Richardson, recently was advised by the Kings county grand jury that it had adopted a resolution commending him for his action in appointing a crime commission to consider revision of criminal procedure in California. The grand jury will urge the legislators of that district to support any movement to remedy the faults of the existing system.

The commercial possibilities of rubber-yielding plants is the subject of investigations being conducted in Mission Canyon, near Santa Barbara by Dr. Frederic Edward Clements of the Carnegie Institute of Washington. D. C. Dr. Clements is said to be the discoverer of a species of milkweed rich in rubber qualities and with several other Carnegie Institute plant experts experimented with the guayule plant, which is native to Mexico, in the Caregile laboratory at Tucson, Arizona. He has been instrumental in the manufacture of rubber from guayule in that city.

## SISKIYOU PAYROLLS BE INCREASED SOON

Yreka, (Siskiyou Co.).—Increased payrolls in Yreka and adjacent territory during the coming spring and summer will reach the highest peak in many years.

While surrounding cities will be busy in various improvements the expenditure of approximately \$40,000 in a building program by the California-Oregon Power company; \$12,000 by the Yreka Railroad company in betterment of equipment and road beds; \$50,000 by the Pacific States Telephone and Telegraph company on a building program between San Francisco and Portland; \$125,000 for the construction of a general hospital in Yreka; thousands of dollars of state road maintenance money to be spent for the improvement of the Pacific Highway in Siskiyou and several lesser activities, tend to show the activities promised for this region.

Among the fetes and feasts of California, there is none lovelier perhaps, than "The Wisteria Fete," held each year in Sierra Madre, Los Angeles county, under the direction of the Women's club of that city. The fete opened this year March 6, and lasts for two weeks, and it is expected that over thirty-thousand visitors, representing forty-four states and eleven foreign countries will be in attendance. The Wisteria vine, itself, is a marvel of loveliness, covering a large two-story house and many pergolas, and it has been reported to be the largest single vine of its kind in the world. The buds on the vine at present are bursting, and in a short time will be in full bloom.

Farm prospects throughout the state are brighter than for years, and the outlook for the north coast counties are the brightest of all. That is the testimony of David N. Morgan, of Petaluma, who has taught agriculture in high schools of California, was connected with the state college of agriculture and was editor of the Pacific Rural Press. His time now is passed in touring the agricultural centers of the state. No one knows agricultural conditions better than he.

A. C. Johnson, manager of the Bodega Co-operative creamery, at Petaluma, Sonoma county has received a patent for a shoe sole designed especially for those whose work requires them to be on their feet on concrete floors. The invention was made by Johnson as a result of many years experience as a creamery manager, where he had seen men taken ill for indefinite periods as a result of standing on the concrete.

Timber worth \$698,194.16 was actually cut and sold on Federal property in California during 1925, and contracts were entered into for disposal of \$534,304.16 worth of additional lumber, according to figures announced by forestry officials in Sacramento. The various California counties receive 35 per cent of such revenues from the Federal government each year for educational and highway purposes.

The forestry officials and civic organizations of San Bernardino district are furthering a plan for establishing a plantation of trees in Devil Canyon. It embraces the ultimate founding of an experiment station with extensive nurseries from which young forest trees can be transplanted to burned-over areas or barren districts in the San Bernardino National forest for the protection of the watersheds.

Black walnuts and parts of a walnut log have been brought up from a depth of 65 feet in boring a well on the Ripon Nursery property near Lathrop, San Joaquin county. A few of the nuts crumbled away after having been exposed to the air for two days. Others were placed in airtight glass jars for exhibition purposes. On another part of the ranch a seam of coal was cut at a depth of 75 feet.

Preparations already are being made for the spring opening of logging camps in the Susanville region as soon as the weather will permit. At the Lassen Lumber and Box company's plant, and also at that of the Fruit Growers Supply company, crews of men are busy overhauling the locomotives and other equipment. Members of the logging crews are also beginning to arrive.

By a vote of more than 10 to 1, the people of Davis, Yolo county, voiced their approval of a proposed bond issue of \$115,000 for the erection of a new and modern high school. The overcrowded condition of the present buildings made some action imperative. It is expected the present building will be used as a grammar school as soon as the new high school can be completed.

Plans have been submitted for bids to be opened March 18, for the Roseville Union high school, at Roseville, for which \$30,000 bonds have been voted.

The contract for the erection of the new \$14,000 fire station in Napa, Napa county, was let recently by the city council.

The spirit of California's pioneer days and memories of the first transcontinental railroad construction work which began here in 1863 were awakened recently as Sacramento's new \$2,500,000 Southern Pacific station was formally opened with elaborate ceremonies.

## LOOT!

BY ELMO SCOTT WATSON  
(© 1926, Western Newspaper Union.)

### "Set a Thief to Take a Thief"

"SET a thief to take a thief"—that ancient axiom may or may not have been penned in the year 1696, but as events in the life of one Capt. William Kidd, turned out that's what it finally amounted to. For Captain Kidd, the most famous freebooter in all history, started out as an avowed enemy of pirates. His becoming a pirate himself was an afterthought, and probably as much a surprise to him as it was to certain influential friends of his who were expecting him to be the means of putting rich profits in their pockets.

For when Captain Kidd sailed from Plymouth for New York in the spring of 1696 in the little galley "Adventure," he bore the commission of his majesty, King William III, to go forth and take four notorious sea robbers, Captains Too, Ireland, Wake and Maze, "who daily commit many and great piracies, robberies and depredations upon the seas of America and in other parts and also all such pirates, freebooters and sea rovers, being our own subjects, or of any other nations associated with them, which you shall meet upon the coast or seas of America or in any other seas or ports."

The commission had been obtained for him by Earl Bellmont, the newly appointed governor of New York, a Colonel Livingston of that colony, and several English noblemen who had formed a company to finance the enterprise. In addition to capturing pirates and keeping whatever property could be obtained from these outlaws of the sea, Captain Kidd was also empowered to prey upon the shipping of France, England's traditional enemy. Such prizes, however, must be brought to the nearest British port and there condemned and the property disposed of by the proper authorities.

Kidd enlisted 80 seamen in England and 80 more in New York. He had little difficulty in securing just the men for such an expedition. To some of them the lure of rich legalized looting was ample inducement. Each man was to share equally in the spoils, after 25 per cent of their winnings had been deducted for the company. To others, whose past would not bear close inspection, a voyage just at this moment was a blessing, and going aboard the Adventure was a matter of keeping two jumps ahead of the law, whereas remaining on shore meant the usual one jump ahead.

So with his double-barreled commission and his crew of these choice characters, Captain Kidd cast off the lines of the Adventure from a wharf in the Hudson river and headed south Madagascar on the east coast of Africa was his goal. No pirate-hunting "upon the seas of America" for him. His commission also said "other seas and ports" and Madagascar, which came within that category, was the haven of the ocean highwaymen who preyed upon the rich East Indian trade.

### Captain Kidd Turns Pirate

WHEN on one fine spring morning in the year 1696 Capt. William Kidd set sail for New York, bearing a commission from the king of England to suppress piracy in the East Indies, and wherever else such unlawful doings flourished, there was not a man of the 160 aboard the galley Adventure but that greeted with a cheer the prospect before him—the certainty of fame and fortune. Lucky for them that they could not look forward into the future and see the end—their leader and nine of his men in chains in the Newgate jail, on trial for their lives in historic Old Bailey and writhing in the clutch of the hemp around their throats on Execution dock on the bank of the Thames!

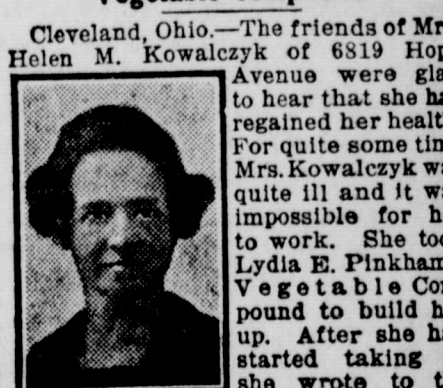

The Adventure touched at the Madeira islands, crawled south along the east coast of Africa, rounded the Cape of Good Hope, ran up to Madagascar, where the captain watered and victualled his ship and then continued on towards India. In the meantime a plague had broken out aboard ship, and at the rate men were dying and being tumbled overboard, it began to look as though the Adventure would have not a fighting man left before ever a pirate ship was sighted. More than that, the captain showed no inclination to get at the business in hand. Here he was near the haunts of the buccaneers, but he made no move to seek them out and carry out the commission of his king.

Instead, he sailed aimlessly up and down the coast of India until there arose loud murmurs among his crew at his indecision and inactivity. Then the captain made his decision, but what force influenced him to it no one can tell. At the port of Bab's Key, in the Gulf of Eden, a fleet of fourteen ships, known as the Mocha fleet, was being loaded with a rich freight for the ports of India. Fearful of pirates the fleet set out with a convoy of Dutch and British ships.

One sweltering day Captain Kidd swung the bow of the Adventure around sharply. Indecision and inactivity was over. William Kidd had made his decision. "We're off to Bab's Key, my lads," he shouted. "We'll ballast this ship with gold and silver and precious stones from Mocha fleet." William Kidd, the hunter of pirates, had turned pirate himself. Did his crew protest at this change of their status? Let the cheer which burst from their throats at his announcement answer that!

## GLAD TO SPREAD GOOD NEWS

Helped by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—The friends of Mrs. Helen M. Kowalczyk of 6819 Hope Avenue were glad to hear that she had regained her health. For quite some time Mrs. Kowalczyk was quite ill and it was impossible for her to work. She took Lydia E. Pinkham's Vegetable Compound to build her up. After she had started taking it, she wrote to the Pinkham Company as follows: "I certainly feel Lydia E. Pinkham's Vegetable Compound. I feel stronger, ready and sleep sounder. I am very glad to spread the good news of how it has helped me."

Detroit, Michigan.—"I heard of this medicine through an advertisement in the 'Detroit News' and wrote to Mrs. Grace Gillem, whose letter was published. Then I started taking the Vegetable Compound and got the best results. I used the Sanative Wash, too. I am really happy if I can advise women to take your medicines."—Mrs. M. E. MURPHY, 12163 Washburn Ave., Detroit, Mich.

Lydia E. Pinkham's Vegetable Compound has been in use by women for over fifty years. It is a vegetable tonic made from root and herbs and is sold at all druggists.

**SPOHN'S**  
DISTEMPER  
COMPOUND

Keep your horses working with "SPOHN'S." Standard remedy for 32 years for Distemper, Strangles, Influenza, Coughs and Colds. Give "SPOHN'S" for Dog Distemper. Sold by your druggist. If not, order from us. Small bottle 80 cents, large 1.25. Write for free booklet on diseases.

SPOHN MEDICAL CO. DEPT. GOSHEN, IND.

**DON'T BE GRAY**  
Darken your gray hair, gradually, surely and safely in privacy of your home. Used over 30 years by millions. Money back guarantee. BOOKLET FREE

**Cuticura**  
Shaving Stick  
For Tender Faces  
EMOLLIENT MEDICINAL ANTISEPTIC

**Putting Clam to Work**

Injecting small organisms into salt-water clams is to be given a trial in an effort to produce pearls in such numbers as will reduce the cost and make the near-gems available for buttons and other ornaments. The foreign object sets up an irritation on the fold of the bivalve, causing the formation of a number of tiny "seed" pearls. These are removed and inserted in the folds of other clams, where they grow to considerable size and luster in a few months. The clam "incubators" can be used repeatedly for successive crops of pearls. They are kept in salt water at a higher temperature than that of the ocean and are fed to stimulate their growth.

When you decide to get rid of Worms or Tapeworm, get the medicine that will expel them with one dose—Dr. Peary's "Dead Shot." 372 Pearl St., N. Y. Adv.

**Affectionate**

Nora—Do you mean to say that your new boss is cross-eyed?  
Dora—Well, I wouldn't like to say he squints, but one eye is apparently so beautiful it can't help looking at the other.

**Sure Relief**

**BELLANS**  
FOR INDIGESTION  
25c and 75c Pkgs. Sold Everywhere

6 BELLANS Hot water Sure Relief

Logic either proves or disproves all things, but it doesn't accomplish any of them.

It's too much to expect cross-bred dogs to be amiable.

Build Up Your Health With  
**DR. PIERCE'S**  
**GOLDEN MEDICAL**  
DISCOVERY

If You Would Avoid  
**COUGHS, COLDS, GRIPPE.**

A Tonic which Dr. Pierce prescribed when in active practice 60 years ago.  
In Liquid or Tablets, at your Druggist. Send 10c. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. Tablets.

## A GREAT NATION

The United States at the present time has the greatest industrial capacity in its history. There is much room for further expansion, and there is a wide field for investment.

We are entitled to judge the future by the past, and the past twenty years in this country have given us machine production, electric power, the telephone, the automobile, the gas engine, chemical processes, the X-ray, the motion picture, the radio and a thousand devices that have widened the opportunities of the people, absorbed the fruits of industry and employed capital in ways that were not seen in advance.

Like other industries which have contributed to national welfare for generations past, new industries are making of themselves a primary need. Luxuries of ten years ago are now necessities. Modes of life have changed completely with new modes of travel, new modes of thought, and new mechanical inventions.

Opportunities of this country are so great that as time goes on, production is bound to increase while buying power expands, lifting to higher levels the standards of our national life.

## ONE MURDER IN YEAR

According to a report recently given out, the city of Quebec, with a population of approximately 100,000, was the scene of only one murder during the year 1925.

In the United States as a whole there are on an average approximately ten murders each year out of each 100,000 population, while in the cities of Memphis, Jacksonville and Birmingham the annual rate during the past five years has averaged nearly sixty murders per 100,000 of population, or nearly sixty times that of Quebec.

In spite of the earnest efforts of sociologists and publicists to determine the cause and suggest a remedy for the deplorable crime situation, no appreciable headway has been made in that direction.

Attempts to explain crime as an aftermath of the war fell flat when it is considered that the homicide rate in England, Canada, Australia, South Africa, New Zealand and other English speaking countries averages only about one-tenth that of the United States. Yet all these were in the war from beginning to end and suffered from its effects in every way immeasurably more than we did.

It is declared by a recent writer that only one murderer out of 160 is executed in New York, while 70 out of 100 are hanged in London. This may have something to do with our high murder rate.

## CHARITY OVERHEAD

The poor we have with us always, and so long as humane impulses animate mankind, we shall seek to relieve the condition of the unfortunate and the destitute. The enormous sums contributed to the relief of distress are often to a large extent dissipated, however, before they reach those for whom they are intended, due to excessive expense in management.

Charity organizations are either international, national or local in their scope. Each must have paid workers, often elaborate headquarters, attractive literature and prepared publicity, all of which cost money which must be taken from the contributed funds.

While in the case of a few organizations, such as the Red Cross and community chests, the overhead expense is comparatively small, in most of them it is a big item.

The trouble is that whenever some one gets the idea of doing charity work, he or she feels it necessary to start a new "movement," instead of co-operating with some agency already in existence. A lot of such new enterprises are launched merely to gratify someone's desire for publicity, and are an imposition on the public.

We shall never have too much real charity, but we have too many organizations and organizations, hence a large part of the funds contributed go for overhead expenses, instead of being devoted to the purpose for which they are donated.

## MOST USEFUL CITIZEN

It has only been a few years back that the suggestion of a public utility president being chosen as the most popular and useful citizen of a city would have been a great joke. For in the old days a public utility was looked upon by the public as a natural enemy.

But Harvey C. Couch, president of the Arkansas Light & Power Company, was selected to receive the 1925 loving cup as the most useful citizen of his home city, Pine Bluff, "for his great and untiring efforts for the development of Pine Bluff and the state of Arkansas, particularly with reference to electrical power developments."

The press dispatch announcing the award also stated that "Mr. Couch is actively identified with all civic movements for the betterment of the city and community and is an untiring worker in the Chamber of Commerce."

A similar cup was awarded for similar reasons to H. M. Atkinson, chairman of the board of the Georgia Railway & Power Company, by the city of Atlanta last month.

Real service to the communities in which they operate is more and more becoming the keynote of modern public utility corporation policy. The companies find that it pays, and the people have not been slow to recognize and approve this change of attitude, which has turned former antagonism into friendliness and co-operation.

## ROADS AND GASOLINE

It requires no elaborate argument to convince any person of intelligence that good roads make possible great savings in time, vehicle wear and gasoline consumption, to say nothing of the added comfort of travel.

Tests on a scale extensive enough to fairly determine what these savings amount to were recently undertaken with several two-ton trucks. It was found that on average dirt roads these trucks would travel slightly less than six miles on a gallon of gasoline, while on paved roads they would make a fraction less than twelve miles to the gallon.

In tire cost it was found that the paved roads likewise showed a saving of approximately one-half, as compared with macadamized roads.

While the exact saving in wear and tear of the vehicle, aside from the tires, is not so easily determined, it seems safe to assume that the life of a car would also be practically doubled through the exclusive use of paved roads.

Considering gasoline alone, it appears that good roads save enough to pay for themselves long before they are worn out, leaving the savings in tires and vehicles as clear profit.

## CELEBRATES TELEPHONE'S FIFTIETH ANNIVERSARY

The story of "The Romance and Achievement of the Telephone" was told Wednesday when upwards of 500 persons were the guests of Manager J. F. Adams of the San Mateo and Burlingame exchanges on the fiftieth anniversary of the invention of the telephone.

Members of the Rotary Club, business men and classes from the Junior College, the San Mateo Union high school and various grammar schools took advantage of the telephone company's invitation to inspect the exchanges at Burlingame and San Mateo and see just how the work of completing local and long distance telephone calls is done.

Forty-two exchange operators are employed at the San Mateo exchange and they handle and average of 12,000 local and 800 long distance calls daily. An average of 900 calls are placed each day with the local exchange for San Francisco.

## MOTORISTS' RUSE FAILS OF PURPOSE

Forty motorists who chuckled at their cleverness in deceiving the law by silently watching the traffic officer copy their former address from registration certificates, laughed a bit prematurely, says the Burlingame Advance. For the warrants which could not be served because of wrong addresses are to be delivered to the new locations which the motorists gave when applying for 1926 licenses. Judge Walter M. Bird has applied to the state motor vehicle department for assistance in finding the culprits, and no time will be lost in halting them into court to explain their conduct.

## ASSESSMENT NOTICE

WATER FRONT TIDE LAND COMPANY.—Location of principal place of business, San Francisco, California. Location of property, County of San Mateo, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 26th day of February, 1926, an assessment (No. 6) of seventy-five (75) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company, Room 910 American Bank Building, 135 California Street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 5th day of April, 1926, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Monday, the 26th day of April, 1926, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

By order of the Board of Directors, WILLIAM LETSON, Secretary.

Office Room 910 American Bank Building, 135 California Street, San Francisco, California.

March 5, 12, 19, 26; April 2, 1926.

## NOTICE TO CREDITORS

No. 3793.

In the Superior Court of the State of California, in and for the County of San Mateo.

Estate of Achille Boni, alias, deceased. Notice is hereby given by the undersigned Administrator With the Will Annexed of the estate of Achille Boni, alias, deceased, to the creditors of and all persons having claims against the said decedent, to file them with the necessary vouchers within ten (10) months after the first publication of this notice in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit them with the necessary vouchers within ten (10) months after the first publication of this notice to the said Administrator, at the office of Fardini & Scampini, Attorneys for Administrator, 485 California Street, San Francisco, California, which said office the undersigned selects as its place of business in all matters connected with the estate of Achille Boni, alias, deceased.

## NOTICE OF SALE OF REAL PROPERTY AT PRIVATE SALE

No. 42,612, Dept. 9.

In the Superior Court of the State of California, in and for the City and County of San Francisco.

Notice is hereby given, that under and by virtue of the provisions of Article IV of Chapter VII of Title XI, Part III, of the Code of Civil Procedure, the undersigned, JENNIE TAYLOR, executrix, and CLARENCE W. WESTBROOK, co-executor, of the last will and testament of A. MILES TAYLOR, also known as ALBERT MILES TAYLOR, deceased, will sell at private sale on or after the 15th day of March, 1926, at ten o'clock A. M. of said day, to the highest bidder therefor, upon the terms and conditions hereinafter mentioned, subject to confirmation by the above-entitled Superior Court, all of the right, title, interest and estate of said deceased, in and to those certain parcels of real property situated, lying and being in the County of San Mateo, State of California, particularly described as follows, to-wit:

Lot twenty-nine (29) and fifty (50) feet strip of land (formerly known as Lot thirty) between said Lot twenty-nine (29) and Lot thirty-one (31), as designated on the map entitled "Finger Park Tract, adjoining Wellesley Park, Redwood City, Cal.", which map was filed in the office of the Recorder of the County of San Mateo, State of California, February 21, 1907, in Volume "A" of Maps at page 35 and a copy thereof entered in Volume 4 of Maps at page 55.

Terms of Sale: Ten percent (10%) of the purchase price will be paid by the bidder for said property, the balance to be paid at the time of the confirmation of the sale of said property by said Superior Court and the tender of the deed for said property. All bids or offers must be in writing and will be received at the office of James E. Colston, Esq., attorney for said executrix and executor, at Room 719 Flood Building, 570 Market Street, San Francisco, California, or may be delivered to the undersigned executrix or executor personally, or may be filed in the office of the Clerk of said Court, at any time after the first publication of this notice and before the making of the sale.

The executrix and executor reserve the right to reject any and all bids.

Dated this 19th day of February, 1926.

JENNIE TAYLOR, Executrix.

CLARENCE W. WESTBROOK, Co-Executor.

James E. Colston, Attorney for Executrix and Executor, 719 Flood Building, San Francisco, California.

Feb. 26; March 5-12, 1926.

## BURLINGAME PLANS \$370,000 BOND ISSUE

Three resolutions calling for a bond election April 12 for the purpose of voting \$370,000 for fire, water and library improvements were adopted by the Burlingame city trustees at their meeting last Monday night. One proposition will be for the voting of \$225,000 for improvements to the water distribution system. The second proposition will be for \$80,000 for new fire apparatus, a new fire building and a fire alarm system. The third proposition will be for \$65,000 for a new public library building. The board also adopted a resolution consolidating the twenty-four city precincts for the April 12 election.

## ART EXHIBIT SCHEDULED FOR JEFFERSON HIGH

An exhibition of pictures will be held later in the high school for the

## NOTICE

## Of General Municipal Election of Daly City on April 12, 1926.

NOTICE IS HEREBY GIVEN that a general municipal election in and for the City of Daly City will be held on Monday, the 12th day of April, 1926, at which election the following offices shall be filled:

Three (3) members of the Board of Trustees.

For the purpose of said election in said City, the said City of Daly City shall be, and is hereby, divided into five (5) consolidated election precincts, to be known and described as "Daly City Municipal Election Precinct No. 1," "Daly City Municipal Election Precinct No. 2," "Daly City Municipal Election Precinct No. 3," "Daly City Municipal Election Precinct No. 4," "Daly City Municipal Election Precinct No. 5," which said five (5) election precincts shall severally contain such territory in the City of Daly City as provided herein.

For such general municipal election the Board of Trustees has appointed one (1) inspector, two (2) judges and two (2) clerks, to have charge of such election in and for each municipal election precinct.

In said Daly City Municipal Election Precincts the polls for said election shall be held at the places and the election conducted, as aforesaid, by the inspector, judges and clerks hereinafter named as follows, to-wit:

Consolidated Voting Precinct No. 1, comprising State and County Precincts Nos. 1, 2 and 3, and the polling place thereof shall be the Fire House of Daly City Fire Company No. 4, on Peoria Street, between Evergreen Avenue and Crocker Avenue, and the inspector shall be Edward Rider, the judges shall be Mrs. Mary Murphy and Mrs. Lily M. Brady, and the clerks shall be Mrs. Helena O'Connor and Mrs. Martha Wagner.

Consolidated Voting Precinct No. 2, comprising State and County Precincts Nos. 4 and 5, and the polling place thereof shall be at No. 162 Crocker Avenue, and the inspector shall be Mrs. Catherine H. Reinhardt, the judges shall be Mrs. Alice C. Bergh and Mrs. Ella McKee, and the clerks shall be Mrs. Janet Y. Turner and Mrs. Jeannette Fischer.

Consolidated Voting Precinct No. 3, comprising State and County Precincts Nos. 6 and 7, and the polling place thereof shall be the Fire House of Fire Company No. 1, at 194 Santa Barbara Avenue, and the inspector shall be Clara A. Poket, and the judges shall be Mrs. Anna Schenk and Mrs. Violet C. Hauptli, and the clerks shall be Mrs. Janet C. Campbell and Mrs. Louise J. Crowley.

Consolidated Voting Precinct No. 4, comprising State and County Precincts Nos. 8 and 9, and the polling place thereof shall be the No. 129 Knowles Avenue, corner of Miriam Street, in said City of Daly City, and the inspector shall be Mrs. Mary A. White, and the judges shall be Mrs. Katherine Tromp and Mrs. Mary Woodward, and the clerks shall be Mrs. Clara Gillet and Mrs. Augusta Devlin.

Consolidated Voting Precinct No. 5, comprising State and County Precincts Nos. 10 and 11, and the polling place thereof shall be the Fire House of Fire Company No. 3, West Lake Avenue near Mission Street, and the inspector shall be Mrs. Grace E. Colvin, and the judges shall be Mrs. Christine Squier and Mrs. Lucy C. Wickersham, and the clerks shall be Mrs. Clara Pfeiffer and Mrs. Christine Michelsen.

At said election the polls shall be open at six (6) o'clock on the morning of the day of such election and shall be kept open until seven (7) o'clock P. M. on said day, when the polls shall be closed, subject nevertheless to the provisions of the laws of the State of California governing municipal elections which will be observed.

Dated: March 9, 1926.

B. C. ROSS, City Clerk.

## NOTICE OF FILING OF LIST OF ASSESSMENTS UNPAID

NOTICE IS HEREBY GIVEN that on the fourth (4th) day of February, 1926, GEORGE A. KNEESE, Superintendent of Streets of the City of Daly City, filed with me, the City Clerk and ex-officio Clerk of the Board of Trustees of said City of Daly City, a complete list of assessments unpaid under that certain assessment, diagram and warrant issued the 23rd day of March, 1925, to Eaton & Smith, said assessment, diagram and warrant being for the work and improvement contracted for, and the contract therefor completed and fulfilled, under and pursuant to the provisions of the "Improvement Act of 1911," as amended, and the provisions of the "Improvement Bond Act of 1915," as amended, and also under and pursuant to Resolution of Intention No. 27, passed and adopted by the Board of Trustees of said City of Daly City on the 14th day of October, 1924, and other resolutions, notices and proceedings duly adopted and taken thereunder, reference to said Resolution of Intention being hereby expressly made for a description of the work.

NOTICE IS HEREBY FURTHER GIVEN that interested persons may appear before the Board of Trustees of said City at the regular meeting of said Board of Trustees to be held on April 13, 1926, at the hour of 8:00 P. M. of said day, at the regular meeting place of said Board, and show cause why bonds should not be issued upon the security of the unpaid assessments as shown on said list, that being the time hereby fixed by me for such purpose.

Dated this 10th day of March, 1926.

City Clerk and ex-officio Clerk of the Board of Trustees of the City of Daly City.

Daymond Fernando is quite well again after his recent illness.

Miss Louise Merlo and Al Zanetti spent last Tuesday evening visiting Mr. and Mrs. Stephen Fischer.

George Krehl, popular greyhound fancier, has just sold his wonderful greyhound, "Bee Martin," to C. O. David, of Hialeah, Florida, at a price of \$1,000. This sets the price for dogs in California, as the previous high price was \$800. Bee Martin won many trophies and purses for George, even though she is but three years old. She is regarded as one of the most phenomenal racers in the country, having carried off the Washington cup at Merced at two years of age. Pictures of Mr. Krehl and Bee Martin were taken by Pathe News, and also appeared in the San Francisco Call. The first event this dog will be entered in will be the Miami Derby in Florida, and much is expected of her.

The death of John Bertucci in San Francisco on March 6 brought sorrow to his family and many friends who loved him. He passed away after an illness of several months, at the age of 24 years. He was the dearly beloved son of Gerolamo and Elvira Bertucci and loving brother of Bocci, George, Albert, Mabel Elvira and Elsie Bertucci, Mrs. Katherine Bocci and Mrs. Lagomarsino, and was a native of Colma. The funeral, which was largely attended, was held last Monday from the funeral parlors of Valente Marina, Perata & Company, thence to Holy Angels church, San Pedro avenue, where a requiem mass was offered for the repose of his soul. Interment was in the Holy Cross Mausoleum. The many friends of the family extend their sincere sympathy in this bereavement.

### WELCOME HOME JIMMY

"Hello, know-it-all!"  
"Oh hello! Oh well, well, if it isn't the old Deadhead again! Well, what less do you know today for a natural habit?"  
"Not so less as you think, old top. I found out something since last week that you don't know. I caught some fine pieces of news about 'Welcome Home Jimmy.'"  
"Oh, you couldn't catch a cold!"  
"No? No? Who told you no? Listen to this—Do you know you forgot a character in the cast last week? Well, she is 'Melinda Preston,' played by Victorine Bertini."  
"Oh, you little imp you, where did you grasp that piece of news from?"  
"And you don't know anything about the cast either, if you ask me."  
"No?"  
"No. Do you know who 'Lucille Brooks' falls in love with, do you know what 'Chess McSwope' does that makes 'Val Gardner' feel like murdering; do you know what goes on between 'Peggy Sommers' and 'Danny Banks'; do you know what 'Melinda Preston' does to make 'Allie Thomas' exceedingly, childishly happy; do you know what 'George Pierce' has been doing all through the play? No, I knew you didn't. Now who's the deadhead, huh? Whose's the deadhead?"  
"Um-m. Since when did you turn out to be a relative of Sherlock Holmes, Hawkshaw?"  
"You'd be surprised."

Well, folks, don't forget "Welcome Home Jimmy," a three-act drama to be given by the Santana and Santangelo Clubs at the New Colma Theatre, Monday evening, March 15, for the benefit of the Holy Angels church, under the direction of Miss L. Collopy and Miss M. Belli. Get in line for your tickets, any of the cast has them; the price is 50 cents. Start saving your dimes now. Here's the cast of remarkable talent from your own home town:

Mrs. Brooks ..... Clara Belli  
Lucille Brooks ..... Rose Dianda  
Peggy Sommers ..... Anita Varni  
Melinda Preston ..... Victorine Bertini  
Valentine Gardner ..... Albert Belli  
Chesterfield McSwope ..... Mansuetto Granucci  
Allie Thomas ..... Rosa Bauer  
George Pierce ..... James Varni  
Danny Banks ..... Ed Devincenzi

Christian General Feng executed a few deserters in order to stiffen the morale of his troops. Incidentally it stiffened the deserters, also.

### NOTICE OF HIGH SCHOOL TRUSTEES ELECTION.

On Friday, March 26th, 1926, one Trustee will be elected to the High School Board of Trustees.

Election boards will be the same as the boards appointed to conduct the grammar school elections.

In Jefferson district the polls will be open from 8 A. M. to 8 P. M., at the Jefferson Hall in Colma, the Crocker school in Daly City, and the Vista Grande school in Daly City, the districts being divided the same as for the grammar school election.

In Pedro, Tobin and Visitation Valley districts the polls will be open from 2 P. M. to 6 P. M.

Signed:

MRS. STELLA JENSEN,  
Clerk High School Board.

## SYNOPSIS OF LIFE OF ST. PATRICK

By REV. JAMES DONOHOE  
Pastor St. Maximus Church

In the designs of Providence, St. Patrick was the one who was to bring into the Christian faith the people of Ireland. Previous to his time other evangelists had attempted that arduous task, but because of the hostility of the natives, and perhaps because of their own lack of equipment, they failed. In the person of St. Patrick, God in His wonderful way, raised up one who, by nature, by bitter experience, and by grace, was especially adapted for this particular work.

St. Patrick was born towards the close of the fourth century, and was of noble extraction. Just where he was born is of little importance; some times he calls himself a Roman and some times a Briton. One thing we are certain of is that while he was a mere youth he was taken captive and brought to Ireland, and whilst there he underwent great hardships and sufferings, tending his flocks and herds night and day, in the sweltering heat of the summer sun, and the biting colds of winter. But Patrick had in his early youth been reared in a true Christian home, by good Christian parents, and now that he was suffering, these very pains he was suffering drew him nearer to God. The beautiful and consoling doctrine of the Savior was his hope and consolation.

This captivity had a two fold effect on our saint; it developed in him the true Christian character, inured him to hardships and acquainted him with the language, customs and characteristics of the people whom, unknown to himself, God had chosen to bring to the knowledge of the true faith. Naturally Patrick was not satisfied with his lowly condition, and like a true Christian he prayed to God to deliver him from it.

He longed for the home of his childhood, his parents, his friends, his liberty. After seven years of a stern novitiate, an opportunity presented itself and Patrick escaped. We can imagine his joy on regaining his long sought for desire, but it was to be short lived. God had ordained otherwise. Waking or sleeping he was haunted by a vision. He saw the little children of Erin reaching out their hands to him, beseeching him, imploring him to return to them, to come and walk amongst them and set them free.

St. Patrick recognized the call, "follow me," and although it meant the sacrifice of everything dear to him, he did not hesitate, he did not falter, but immediately set out to prepare for the great mission to which God had called him. Bitter was the separation from those he dearly loved, yet sweet was the consolation to know that he was doing it for God, and because God wished it. He betook himself to one of those great seats of learning in southern Europe, and for twenty years he fasted and prayed and studied, to thoroughly equip himself for the greatest of all missions. At length he was ordained priest by St. Germanus. He then submitted his plans to Pope Celestine, who approved and blessed his mission. He was consecrated bishop, and appointed by the Vicar of Christ on Earth to bring forth fruit in far distant lands.

Setting out for the scene of his future labors, accompanied by a chosen band of holy men, he arrived on the coast of Ireland about the year 432. Patrick finally selected that part of the country which he knew best as his first landing place, and from that time on, in season and out of season, he preached the doctrine of Christ crucified to all men.

The time was ripe for his coming, the nation was ready. The form of religious worship practiced by the Irish knew as Druidism, was the most refined of all pagan forms of worship. The Irish people of that time were, it would seem from the relics and traditions that have come down to us, the most enlightened of pagan nations. They were proficient in war, in agriculture, in navigation, in architecture, in music and song. Because of these peculiar circumstances and because of the great natural and acquired ability of St. Patrick, and the many astounding miracles which surrounded his preaching, they became an easy conquest.

We will review a few of the most remarkable incidents which led to the total destruction of paganism and the establishment of Christianity for all time in Ireland. The first occurred on the hill of Tara. It came about in this way. This hill, the most beautiful of the green hills of Erin, is located in the center of the island. On it the high king lived, and as was the custom, once a year he invited all the Irish princes and people and Druid priests to take part in the services which were held annually at his palace. These festivities were most elaborate and lasted several days, opening up with games and religious services performed by the Druid priests. St. Patrick heard of these and immediately set out for Tara. His plan was to convert the leaders of the people first, which proved very successful. On these occasions an edict was issued by the king that all fires throughout the kingdom should be extinguished until the signal fire was kindled at the royal mansion. On the eve of the same day St. Patrick arrived at a hill opposite, and in full view of Tara, the eve of the first

### SHORE LEAVE

With DOROTHY MACKAILL

Easter Sunday in Ireland. St. Patrick according to the custom of the church, lit the paschal fire; its tiny blaze caused consternation at Tara. The Druid priests assembled around the king, told him that this fire lit in defiance of the royal edict, would blaze forever, if not extinguished that very night. A dispatch was sent to execute the offender, but Patrick was saved by Divine intervention. The following day he was ushered into the presence of the king and his court.

The Druids and magicians put forth their strongest endeavors on this day to maintain their sway over the people. They spread over the hill a cloud of more than Egyptian darkness. Patrick defied them to remove it; they failed; and at his prayer the sun sent forth its rays and lit up the scene. By the power of the devil the high priest of the Druids was lifted high up in the air, but at the prayer of St. Patrick, he fell upon a rock and was dashed to pieces. St. Patrick then informed the king and his assembled people of the nature of the religion he brought them. On this occasion he plucked the little shamrock from the greensward under his feet to help him in his instruction on the blessed Trinity, three in one. Thus was the prediction of the Druids fulfilled, Christianity triumphed, and the fire lit by the saint was never more to be extinguished.

Thousands were converted. With these the saint left a few of his devoted followers and set out for the west coast. On his way thither he encountered a vast multitude worshipping the chief idol, which was a huge stone pillar, covered with slabs of gold and bronze, and a circle of minor idols about it. St. Patrick smote it

with his crozier and it instantly crumbled to dust.

## LEGION'S NATIONAL AVIATION PROGRAM

Suggestions for a national aviation program are being laid before the nation by the American Legion. These suggestions are in the form of detailed proposals for a proper development of American aviation in all its phases.

The plan was officially put before the nation by the national executive committee of the Legion. It was worked out by Reed G. Landis of Chicago, chairman of the Legion's National aeronautics committee.

When the plan was adopted, the committee adopted a resolution reaffirming its Omaha declaration that the organization is impressed with the proposal for a single department of national defense under one civilian secretary, with assistant secretaries for land, sea and air forces.

Reports of President Coolidge's air board, of the American aviation mission, of the government efficiency board and of the Lampert committee on aeronautics in the house of representatives were carefully studied by Mr. Landis in preparing his plan. He also held conferences with military authorities of both the War and the Navy departments.

For military aviation the Legion program is:

- (a) Substantial expenditure each year for modern flying equipment.
- (b) Survey and destruction of obsolete equipment.
- (c) Promulgation of regulations on rank, pay and duty to fit specialized work.
- (d) Appropriations sufficient to provide adequate equipment and training for the reserves and the National Guard.

Encouragement of civilian and commercial aviation, apart from military aviation was recommended. Means suggested to this end were:

- (a) Establishment of a bureau of aeronautics in the Department of Commerce.
  - (b) Extension of the air mail, preferably by contract.
  - (3) Construction of lighted airways and dissemination of proper weather information.
  - (d) Release of a reasonable amount of surplus aviation equipment to civilians at fair prices.
  - (e) Program of education and commercial encouragement prepared and executed by the bureau of aeronautics.
- Means recommended for the encouragement of the aircraft industry were:
- (a) Cessation of government competition.
  - (b) Instituting a program of continuous production.
  - (c) Protection of rights of design.

## Name Prize Winners in Legion Poster Contest

Winners of the American Legion auxiliary citizens' military training poster contest were announced recently by Mrs. Eliza London Shepard, national president of the auxiliary. The contest was commended by the War department.

The winners are: First, Ben A. Benson, Lincoln, Neb.; second, William A. Willmarth, Omaha, Neb.; third, Wiley Padan, Salt Lake City, Utah; honorable mention, Dwight L. Burke, Fort Wayne, Ind.; Forrest Wood, El Paso, Texas; George L. Shafer, Wilmington, Del., and E. C. Warren, Washington, D. C.

Prizes of \$150, \$100 and \$50, respectively, were awarded.

Maj. Gen. Robert C. Davis, adjutant general of the United States army and one of the judges of the contest, wrote Mrs. Shepard: "The American Legion poster contest having come to a successful close, I desire to take this opportunity of expressing both my personal appreciation and that of the War department for the splendid cooperation received from you and your organization."

## System Does It

Brown walked into a restaurant, picked out a certain table and sat down. Before he had time to open his paper a waiter placed a meal before him.

"How in the name of everything do you get such service?" asked a friend, who had been watching. "Do you own the place?"

"Oh, no," replied Brown modestly. "It's a little system I'm trying. The last time I was in town I came in here and gave my order. This is it."—The American Legion Weekly.

## Novel Membership Campaign

In the heart of Miami, Fla., members of the American Legion constructed a realistic dugout during a membership drive. The dugout, constructed of sand bags, was an exact reproduction of shelters used by American troops on the front in France. It was used as headquarters of the campaign.

## Mary D. S. Citations

Approximately two hundred American Legion posts were awarded Distinguished Service citations by national headquarters for having surpassed their 1925 membership for 1926 before the first day of December, 1925.

## VARIED PROFESSIONS THAT WOMEN CHOOSE

There are but few trades or professions that at this time do not have women working in or at them. The latest is the gasoline filling station—operated by women. Edith Crognale, twenty, of Ossining, N. Y., with her mother, operates the "Garden Gas Station," which is situated at Albany Post road and Highland avenue, Ossining, N. Y. The camera man caught the young lady while at work.

## PEDESTRIANS ARE ACCIDENT VICTIMS

### Drivers Must Be Careful to Avoid All Injury.

Sixty-five to 85 per cent of all persons injured or killed in automobile accidents are pedestrians. There should be, however, no general conflict between "pedestrians" and "motorists" because all of us are pedestrians at times and most of us are motorists at times. Each must respect the other's rights. The reckless or inconsiderate motorist and the "dare-you-to-hit-me" pedestrian are each a menace to others as well as themselves.

Pedestrians have rights on the streets; so have automobiles and other vehicles. Because some pedestrians use the streets carelessly and incautiously, there is no excuse for the drivers of motor vehicles not taking every precaution to avoid injuring pedestrians. The law is usually on the side of the pedestrian, and properly so, for he is usually the chief sufferer.

### Accidents at Crossings.

Automobile drivers must be especially careful to avoid injuring pedestrians who cross the street at the middle of the block.

Many accidents happen at regular crossings. If pedestrians do not or will not pay attention to your horn, remember that some people are deaf, while others are mentally deficient, and that hundreds of people are using the streets whose old age, youth, infirmities, and physical defects would throw all the responsibility of an accident upon you.

Be especially careful when two or more people are crossing the street together. Quite often before an approaching automobile one person may stop and one go on, or they may go in opposite directions.

Above all, do not unnecessarily or suddenly squawk your horn. Pedestrians may be easily frightened and temporarily "paralyzed."

### Accidents Behind Street Cars.

Drivers should stop ten feet behind street cars which have stopped to load or unload passengers. In some cities where there are safety zones automobiles are permitted to pass standing cars if they do so slowly.

People who have just alighted from a trolley car are sometimes bewildered and do not know which way to go. Give them plenty of time to get their bearings before attempting to pass them.

Regardless of who you think is at fault, if your car injures or kills some other person, you are usually held responsible. Juries are inclined to be sympathetic and to favor the pedestrian.

Moreover, no matter who was to blame, and in spite of large sums of money paid for "damages," the dead cannot be brought to life, nor could anything or anybody console you in case the one killed happened to be your wife, your child, or someone else near and dear to you.

## Quick and Economical

### Way to Repair Blow-Out

A rapid and economical way to repair a blow-out on the road is to lace up the tear with ordinary wire belt lacing. To make a good repair job in fifteen or twenty minutes, cut away the loose rubber around the blow-out so you can extend the lacing an inch or so beyond each end of the break. Then with a hat pin or sharp, small nail punch a number of holes along the edges of the cut, being careful to make them equidistant and not too close together or too near the sides of the opening. Next lace up the cut with the wire lacing, using only one strand to each hole and keeping the tension of the wire strands as uniform as possible. A double row of wire lacing, one over the other, will be much stronger than the single row. You must be sure to place a piece of canvas, cardboard or leather inside the casing, over the laced part, to prevent injury to the inner tube by chafing, which would otherwise occur.

The wire lacing employed should be the best obtainable to insure sufficient tensile strength combined with the necessary resistance to torsion and flexion. For an old shoe such a repair will prove very satisfactory without going to the expense of vulcanization.

## Ruling Guards Children

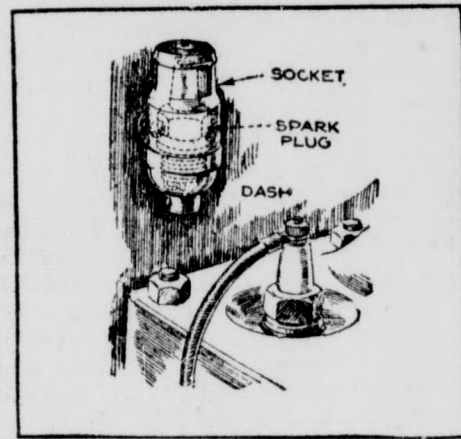

Any automobile driver who strikes a child six years of age or under on a public highway or street is immediately responsible civilly and criminally for the accident, according to a decision of the Chicago Municipal court, which has just been confirmed.

In that decision it was held that a child of six years of age or under cannot be guilty of any contributory negligence, inasmuch as it is not really responsible for its actions, and that the entire onus of an accident involving such a child rests squarely upon the shoulders of the driver.

## Useful and Convenient

### Holder for Spark Plug

The shell of an old lamp socket makes a good holder for carrying a spare spark plug. The shell may be attached to the inside of the dash by means of a screw or bolt, as shown in the illustration. A hole for the screw is punched or drilled through the shell.

Neat Spark-Plug Holder.

opposite the slit used for the key or pull chain, and the screwdriver is inserted through this slit to drive the screw home. A spare plug carried in this holder will not be damaged, as the shell is lined with heavy insulating paper, and by wrapping the plug in a rag it can be stuffed in tightly.—Popular Mechanics Magazine.

## Looking for Trouble in

### Unsuspected Wire Leak

Many times a troublesome skip in a cylinder is due to an unsuspected leak in a high tension wire. When hunting for such trouble, go over the wires carefully, raising them slightly from any such place where there might be a leak. When found, the place must be covered with electric tape, unless a new wire is installed.

If the wire runs through a metal tube it will not be possible to trace the whole length of it, so it must be removed from the tube and connected up as before. By running the engine and going over the wire inch by inch the leak should be discovered. If it is not strong enough to give a spark it may be found by passing the fingers along its length. A slight shock will indicate the trouble instantly.

Braided insulation is particularly liable to pick up moisture and short-circuit every time it rains. When the missing cylinder is located you should parallel the wire—that is, lay a new or perfect wire from distributor to plug. Disconnect the old one and the engine should pick up speed and the missing should stop.

The safety spark gap of a magneto rarely gives trouble, but it may at some time. It has too much resistance in ordinary circumstances, but if the gap in the spark plug burns too wide it will be easier for the current to short-circuit through the safety gap. Run engine and listen carefully for a spark. If it occurs look at the gaps of the plugs and set all of them to the thickness of an old hack saw blade.

## Battery Requires Water

### to Function Properly

You cannot live without food and your battery cannot work without water. The battery loses water under the most healthful conditions. Some of the loss is due to evaporation, but is generally due to its decomposition into its constituent gases, hydrogen and oxygen. The necessity for frequent water filling of all the cells is an indication of excessive charging. If such a condition is noted, the owner should at once have his generator inspected and tested, also the charging rate reduced.

## Daddy's Evening Fairy Tale

By Mary Graham Bonner

### THE TWO LEOPARDS

"I have more sense," said the Leopard.

"That's nothing of which to boast," said the Black Leopard.

"What does sense do for us? It doesn't do anything worth while."

"Now food feeds us."

"You don't say so," snarled the Leopard.

"That's really extremely bright of you to say that food feeds us."

"I would imagine, of course, if you hadn't been so good as to tell me, that food covered us up when we went to sleep, or that we took baths in it, or that we hid under it when the enemy was trying to get us."

"You talk to me in such a rude fashion!" growled the Black Leopard.

"How dare you, when you know that I am considered the crossiest of all the Cat family."

"And now, thinking it all over, you didn't even say that we had sense."

"You only said you had it."

"Well," said the Leopard, "you didn't seem to mind much then."

"Now you are objecting just because you want to quarrel about everything you can."

"You are naturally a mean fellow. I am not to be compared to you as far as mean ways are concerned."

"I am glad you admit you are my inferior and that I am your superior," snarled the Black Leopard.

"I suppose you know that an inferior is one of little importance and a superior is one of great importance."

"An inferior is not so superior as a superior."

"I admit nothing of the sort," said the Leopard.

"And your meanings are more or less true but have nothing to do with the case."

"Why not, I'd like to know?"

"Oh, I'll tell you. But I do admit that I have sense."

"I can hide cleverly from the enemy. That is sensible of me."

"I only seek smaller animals when I am free, and so do not run such dangerous chances."

"I came from Asia and I have bigger spots than my African relatives."

"Of course spots and sense have nothing to do with each other except they both begin with the same letter."

"I can do all those things, too," said the Black Leopard, "and I also came from Asia."

"Yes, I came from that fine part of Asia from where all black leopards come."

"You can't boast when I am around."

"You find you aren't any better than I am."

"You find, in fact, that you are not nearly so fine as Mr. Black Leopard."

"In other words you aren't as fine as I, Mr. Black Leopard, myself."

But the Leopard knew that the Black Leopard was always cross and

ugly and loved to do harm so he decided he wasn't worth talking to any more.

He knew the truth of what he had said, and he knew he would not be able to convince the Black Leopard of anything except his own wild ways.

And he didn't have to bother to do that, for the Black Leopard was well aware of them.

Oh yes, the Black Leopard knew his own wild disposition and saw no reason to change it for a better one. In fact he was satisfied to be dissatisfied.

"I Am Your Superior," Said the Black Leopard.

He knew the truth of what he had said, and he knew he would not be able to convince the Black Leopard of anything except his own wild ways.

## NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Mrs. Ruebeler, of St. Helena, spent Wednesday evening visiting Mrs. H. H. Smith.

Business has become so brisk at Peter's Lunch that the genial Peter has found it necessary to engage a cashier.

Don't forget the St. Patrick dance at the Jefferson Union high school on March 19. Invitations can be secured from any student.

Frank Roach, of Menlo Park, who has announced that he will be a candidate for sheriff, was in Daly City Monday, calling on old time friends.

Mrs. M. Smith, of Santa Barbara avenue, was knocked down by a machine at Russia and Mission last Saturday. She is recovering nicely.

Due to their high scholarship, Fred Junker and John Emerson, students at the San Mateo Junior College, are members of the Junior College Honor Society this year.

Foster & Kleiser have repainted all their billboards throughout Daly City.

Mr. Singer, of Crocker Tract, has been ill in St. Luke's hospital for the past week.

Mr. and Mrs. Charles Nealley, of Long Beach, visited Mr. and Mrs. R. A. Canine last week.

The Daughters of Israel held their regular meeting last Thursday at Congregation B'Nai Israel.

Mrs. Kimball, of Kansas City, and Mrs. Armour, of San Francisco, visited Mrs. H. Fellows last week.

Miss Elsie Bleasdale was married to Mr. William Stephens last Saturday. Both of the newly-weds resided in the Crocker Tract.

Walter White is planning a trip to Monterey this week end, and it's a safe bet his many friends will be supplied with fish Monday morning.

A box lunch picnic is being held this afternoon at Jefferson Union high school, being sponsored by the Parent-Teachers' Association. Later in the evening there will be dancing.

Dr. F. P. Callen, our local dentist, is recovering from a minor operation, having had his tonsils removed last Saturday, and will be back at his office Monday morning, ready to care for his patients.

An excellent Arbor Day program was held last Tuesday in the Jefferson Union high school auditorium. Two reels of films on trees were shown, and Elmer Blacklock gave a talk on Luther Burbank.

The grocery store of P. Murray, being built at Hanover and Roosevelt, will open soon.

There will be a meeting of the Associated Firemen of San Mateo County next Tuesday in Burlingame.

Mrs. R. E. Wall was a guest of honor at a dinner and theatre party given last Wednesday evening by some of the members of the Chummy Club.

Mr. and Mrs. Richard Stockton, of Miriam street, are leaving for the south Saturday for a visit to relatives. They plan to stay several weeks.

In a spirited baseball game last Wednesday at Balboa Park, Jefferson Union high defeated St. James Union high of San Francisco by a score of 11 to 6.

The Ladies' Auxiliary of Company No. 3, Daly City Volunteer Fire Department, held a very successful whist party last Thursday in the company fire house.

As March has five Tuesdays, the St. Maximus Girls' Club are planning to hold their monthly meeting the fourth Tuesday of this month, March 23, instead of the last Tuesday.

The Lenten services held Wednesday and Friday evenings at St. Maximus church have been well attended. Last week Father Lewis ably conducted the mission. This was well attended also.

The Ford truck belonging to Louis Ross, grocer, caught fire Thursday morning at Mission and Vista Grande. Mr. Witt of Colma ably assisted in extinguishing the blaze. The damage was confined to the front part of the truck.

The Arbor Day celebration at the Jefferson Union high school last Sunday was highly successful. A number of palms, shrubs and flowers were planted. Mr. M. Jensen is to be congratulated on his successful effort at "perking up" the school.

A special St. Patrick's Day program will be presented at the State Theatre, Wednesday, March 17, when the feature will be "The Making of O'Malley." There will be Irish jig contests, and William McParlan McGregor, the well known Daly City tenor, will sing Irish songs.

The Liberty Bank is presenting a most neat and attractive appearance as a result of the cleaning of the outside of the building, which in conjunction with the recent redecoration of the interior of the building, makes it one of the most attractive business structures on the peninsula.

The Crocker Eighth grade went on its annual hike up Mt. Tamalpais on Tuesday. Professor W. J. Savage, district superintendent of schools, was in charge. Mrs. Frary, teacher of the Eighth grade, assisted him and baked several immense angel food cakes, which were greatly enjoyed by the thirty-five hikers.

Mrs. R. E. Wall acted as hostess at an afternoon tea given at the home of her mother, Mrs. H. O'Connor, last Thursday afternoon. Those who enjoyed the afternoon were Mrs. Wm. Moran and son William, Jr., Mrs. Henry Lorenz, Mrs. Gus Grieder and daughter Margaret Ann, Mrs. Richard Stockton, Mrs. Hazel Lagomarsino and son George, Jr., Mrs. John O'Connor, Mrs. Walter Fricke and children, Mrs. H. O'Connor and the hostess, Mrs. R. E. Wall.

Mrs. Victoria Szymanski, of San Francisco, passed away Thursday at the San Francisco hospital. The remains were brought to the parlors of W. C. Lasswell & Co., funeral directors. Funeral services will take place tomorrow from the chapel of W. C. Lasswell & Co., thence to the Church of the Nativity in San Francisco. Interment will be in Holy Cross cemetery. Mrs. Szymanski was a native of Poland.

"Wild Justice," a tale of the lonely North country in which a dog plays the starring role, brings new honors to Pete the Great, the marvel dog. "Wild Justice" will be shown at the State Theatre next Sunday, March 14. Peter the Great is supported by an unusually well-balanced human cast, including George Sherwood, Frances Teague, Frank Hagney and others. The serial "Green Archer" will also be presented, as well as excellent vaudeville.

### FRANK ROACH ANNOUNCES HIS CANDIDACY FOR SHERIFF

To the People of San Mateo County: I hereby announce that I am a candidate for the office of Sheriff of the county of San Mateo. I take this opportunity for stating that I will make an honest and strenuous campaign, and if elected I will serve the people without fear or favor.

FRANK ROACH.  
Dated: March 5, 1926.

—Adv.

### ANNOUNCEMENT

Daly City, March 7, 1926.

I wish to announce that I have withdrawn as a candidate for City Trustee. I thank my friends.

JAMES R. BEIRNE.  
—Adv.

## :: RADIO ::

Conducted by Marc Worst

Question: Which size of wire is the best for radio work? A. R.

Answer: There are several sizes needed for the best results. In general the larger the wire the less ohmic resistance it offers, but the more distributed capacity. If we use a very large wire the ohmic resistance would be low but the distributed capacity high, thus making the effective resistance quite high. A very small wire would have too high an ohmic resistance. Thus we must arrive at a happy medium.

For ordinary receiving coils use No. 22 or 24 D. S. C. Cotton covered holds moisture too readily. For best results on receiving coils, use bare No. 18 or 22 and space the turns. The space may be equal to the thickness of the wire itself.

For aerial wire use No. 10, 12 or 14 insulated. Enamel is the best sort of insulation for aerial wire.

For internal set connections use bus bar or No. 14 rubber-covered. If bus bar is used, insulate places where possible "shorts" might occur with spaghetti tubing.

For external set connections, use either one of the excellent new multiple-wire cables, No. 14 rubber-covered or stranded wire rubber-covered.

For transmitting inductances the size depends somewhat on the power used. For best results copper strip should be used, from one-fourth inch to one-half inch wide. Best results will be obtained if this is silver-plated. Space-wind it and support it "on air" if possible.

Summing up the handiest sizes needed by the B. C. L. are No. 14 enameled for aerial, No. 22 D. S. C. for most coils, No. 18 bare for "classy" coils, stranded rubber-covered for set connections, and bus bar (square is easiest to handle) for internal connections.

Question: I have a number of burned out tubes. Can anything be done with them? T. J.

Answer: It is possible to have them refilled at about half the cost of new standard tubes. However, as the latter are so low in price, it is better to buy new ones. A "bum" tube may be used to connect batteries to the set as follows: Break off the glass and solder four leads to each of the tube prongs where they enter the tube. Inside of your set put a socket to fit the tube you are reconvertng. To the four terminals of the socket bring the following four leads from the terminal strip: A minus; B minus. A plus (connect these together and attach as one to one terminal); B plus (detector); B plus (amplifier). Now insert the tube connector (we shall call the reconverted tube by this name) in the socket. See where each lead soldered to the inside of the tube prongs will go, tag it, and connect to the proper battery. To disconnect set from batteries for moving, merely take the tube-connector from the socket.

### MISS MARTHA WORST IS CHOSEN EDITOR OF ANNUAL

Martha Worst has been appointed editor of the Jefferson high school Annual for the year 1926.

The Annual this year will be even handsomer than last, according to Mr. Mork, head of the Commercial department, who has again courageously assumed the responsibility for its production. It will be a task worthy of the best efforts of all to produce any thing to compare with the work so ably edited by Rosa Bauer last year. However, Martha, who has made the four year high school course in three years, and had previously made her last two year course in Woodrow Wilson in a single year, will make a good try at it. Six years of school work in four years is a rather remarkable record, even for Daly City's fine school system.

Martha's brother, Marc Worst, is the only other scholar in the district, so far as we know, who previously completed high school in three years. The old proverb has it that "accidents will happen in the best of families." This time both "accidents" happened in the "Worst" family.

### HIGH SCHOOL FACULTY WILL PRESENT COMEDY

"Lotus Flowers" is the one act comedy, faculty play, to be given April 16, in the Jefferson Union high school auditorium.

Those of the faculty performing are Mr. N. O. Best, who will take the part of Alan Blake, husband of Betty, played by Miss E. Potter, who is greatly interested in psycho-analysis, or in mystics. Mr. C. Cooley will be Jack Durkin, the meek husband of Miss A. Albushie, as Mildred, who is also interested in mystics. Miss E. Torello will be Madame Valeria, the medium over whom much controversy has been made in the Blake household.

The comedy will make you laugh, the mystery will make you guess, and the truth will make you think.

### CARD OF THANKS

We wish to extend our thanks to the Daly City Volunteer Fire Department companies who responded so quickly on Friday, March 6, to the fire that threatened our home.

J. VAN HEUSDEN.  
63 Woodrow street.

The regular monthly business meeting and social hour of the Woodrow Wilson-Vista Grande P. T. A. will be held next Tuesday afternoon, March 16, at the customary time and place. The program this month is to be furnished by the Seventh and Eighth grade pupils of the Woodrow Wilson school. The meetings are open to all the ladies in the community, and a cordial welcome awaits you.

Members of St. Maximus church will celebrate St. Patrick's day, Wednesday, March 17. A dance will be given in the Daly City Auditorium. Two beautiful Persian rugs will be given away on this occasion. A whist will be held simultaneously in the parish hall. Supper will be served from 10 o'clock on.

It rains more on the just if he leaves his umbrella within reach of the unjust.
